- |                |                       |                     |                          |
|----------------|-----------------------|---------------------|--------------------------|
| Surgery Suite  | ENT                   | Oncology Treatment  | MRI/PET/CT               |
| Trauma & ICU   | Diagnostic Laboratory | Patient Ward        | X-Ray & Ultrasound       |
| ER Treatment   | GI & Endoscopy        | Trauma & Diagnostic | Pharmacy & Testing       |
| Orthopedic     | Oral Surgery-Dental   | Women's Health      | Tourist Medical Facility |
| Community Care | Preventative Care     | Mammography         | Disaster Relief          |
| Cardiology     | Ophthalmology         | Pediatrics          | And more...              |

The applications are limitless...

Custom design allows for sophisticated interiors and usage of the most advanced technology available - on a highly mobile platform

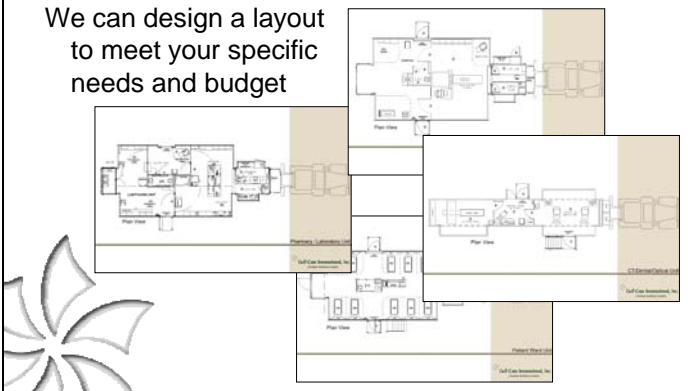

Advanced technology integration in each mobile unit allows for the most sophisticated clinical designs and features for patient treatment stations

## Numerous platform designs

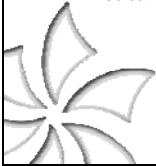

We can design a layout to meet your specific needs and budget

## Fully Integrated Systems

Custom design allows for custom integration of systems

- Medical HVAC
- Medical Gases
- Medical Grade Plumbing
- Medical HEPA Filtration & Circulation Systems
- Medical Lighting
- Advanced Hydraulic Systems
- Electrical Systems with Primary & Secondary Power Sources
- External Water Connections
- Telemedicine Capabilities
- Advanced Communications Options
- Emergency UPS back-up

## Information Technology Possibilities

- IP Telephony
- Data System
- Intercom
- Entertainment & Entertainment Controls
- Wireless Communications
- Internet Connection
- Ethernet Connection
- Analog phone back-up

## Highly Mobile and Durable Platform

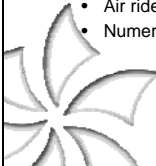

### Chassis

- Full length twin I-Beam steel chassis
- All steel tube frame construction
- Exterior aluminum skin
- Double insulation available
- Landing legs for stability
- Lower compartment storage

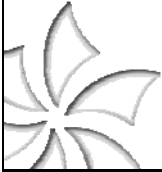

### Tractor

- Air ride upper coupler and suspension
- Numerous cab options available

## Our unique project approach

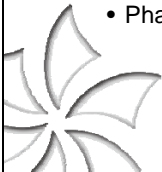

*Design-2-Delivery* was developed by Gulf Care Mobile Systems as a turn-key system for creating comprehensive mobile solutions from conception to implementation

Every aspect of the project is closely monitored

*Design-2-Delivery* is a 5-Phase process which ensures the highest quality outcome

- Phase I: Planning & Design
- Phase II: Structural Shelter Fabrication
- Phase III: Total Systems Procurement
- Phase IV: Assembly and Delivery
- Phase V: Training & Ongoing Maintenance
